

# The Skeletal System

## Anatomically Engineered To Be The Best

Consider the anatomy of the Pelvis and Femur. In an AP view, the Ischial Tuberosity is located about half the distance from the mid-line to the Femur.

## Anatomically Engineered To Be The Best

fig 1

Hare Ischial Pad Splint. Angle of malalignment is 51 degrees.

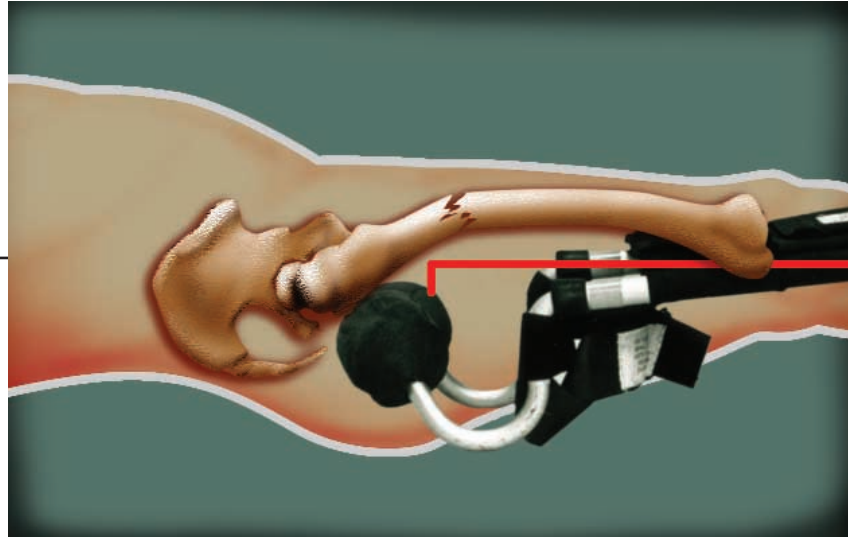

fig 2

Sager Emergency Traction Splints provide near perfect alignment.
